

INTERNATIONAL VIRTUAL AVIATION ORGANISATION

The International Virtual Aviation Organisation (IVAO) embodies the excitement and passion of flight simulation fused with the adventure of online Air Traffic Control. IVAO is truly "where the virtual world meets the real world..."

Many thousands of pilots enjoy this completely free community driven global network to fly to hundreds of airports daily. A unique combination of voice servers, real world weather servers and aviation databases provides an unparalleled experience for the online aviation enthusiast.

IVAO is established in over 50 countries with a rapidly growing membership in excess of 150,000.

Our members not only provide real time Air Traffic Control for our pilots but also enjoy a host of regional and international events including IFR, VFR and Special Operations. Our famous World Tours bring together the delights and challenges of aviation from across the globe and our Crowded Skies event lights up the airways with thousands of pilots simultaneously online.

With free training, dedicated integrated software, virtual airlines and a huge global community; whether you are a keen ATC beginner or seasoned commercial pilot, IVAO provides the most realistic online aviation environment available.
